

WHAT DOES

CRAWFORD MFG. DO?

**OUR
HIGH**

QUALITY wire form, stamping, spring form, assembly and packaging capabilities allow us to serve a diverse marketplace.

Our mission is simple: Design, Delivery, Dependability. We will partner with you to design the best solution for your needs. We will deliver high quality cost-effective parts as promised. You can depend on us to provide outstanding service and value. We would be honored to have your business.

We can make your quality products out of a large variety of metals: Carbon Steel, Galvanized Steel, 300 Series Stainless Steel, Music Spring, HDMB, Oil Tempered (Basic, Chrome Silicate, MB), Brass, Copper, Aluminum, pre-plated, specialty tensiles, or your specialized requirement.

**Quality, Reliability, Customer Focus,
Design and Engineering, Volume Feasibility**

Looking for a quality manufacturer?
We are always ready to serve you.

WIRE FORMS

We use time tested and proven methods to form wire into various shapes on our multi-slide and verti-slide machines.

Wire Diameters: .010 to .250"

Feed Lengths: Up to 26"

Additional Capabilities:

Pressed Ball Ends, Deburring, Multi-dimensional forms, Spring-back and Tensile special requirements

FORMED STAMPINGS

We specialize in small to medium sized stampings in higher volumes on our multi-slide and high speed stamping presses.

Press Rating: Up to 50 Tons

Press Speed: Up to 800 strokes per minute

Material Thickness: .005 to .125"

Additional Capabilities: Deburring, Spring-back and Tensile special requirements, Reel-to-Reel production

SPRINGS

Our company began as a spring manufacturer and we have improved and perfected our capabilities with coilers, a CNC Spring Forming Machine, and hand forming.

Wire Diameters: .010 to .250

Types of Springs: Recoil/constant force, compression, extension, torsion

ASSEMBLY & PACKAGING

We can assemble your parts with our springs, wire forms and/or stampings to supply you with sub-assemblies for integration into your production line or finished and packaged assemblies ready for distribution.

Mechanical assemblies, packaging for distribution, skin packaging, and bagging
